

Purchase a Cytation or Lionheart Imager, get BioTek's patented Laser Autofocus or Gen5 Image+ FREE

BioTek's Cytation and Lionheart imagers offer excellent image-based autofocus for many sample biologies.

Benefits of 4x - 40x laser autofocus:

- Improved speed with dim fluorophores and transmitted light
- Superior reproducibility with no effects from well debris
- Highest accuracy in long term time-lapse workflows
- Minimized photobleaching with lower phototoxicity for live cell assay

Benefits of Gen5 Image+:

- Make movies of live samples and kinetic images
- Image deconvolution for improved resolution
- Digital phase contrast for optimized brightfield imaging
- Subpopulation cellular analysis

Take advantage of this great opportunity to enhance your imaging workflows with BioTek's patented laser autofocus or Gen5 Image+ software!
